

THE SCHOOL GARDEN

YEAR 3: Comprehension Worksheets

THE SCHOOL GARDEN

Mrs Patel's class had a new project — they were starting a school garden! Everyone was excited. Some students planted vegetables like carrots and lettuce, while others planted flowers such as sunflowers and daisies.

Each group had to look after their own garden bed. They watered the plants every day and made sure there were no weeds. As the weeks went by, the plants grew taller and stronger.

One day, a big storm came, and the class was worried their garden would be ruined. But when they checked the next morning, most of the plants had survived. The students were proud of how strong their garden was.

At the end of the term, the class had a garden party. They picked vegetables, made salads, and gave flower bouquets to the school staff.
