

WHY DO BEES MATTER?

YEAR 3: Comprehension Worksheets

WHY DO BEES MATTER?

Bees are small flying insects that are very important to our environment. They collect nectar from flowers and help plants grow by spreading pollen. This process is called pollination, and it helps fruits, vegetables, and flowers grow.

Bees live in groups called hives. Inside the hive, bees work together. Some bees collect nectar, some look after the young, and the queen bee lays eggs. Every bee has a special job to help the hive.

Without bees, many plants would not grow properly, and we would have less food. That's why it's important to protect bees and keep their homes safe.

Multiple Choice

Activity One: Circle the correct answer.

1. What do bees collect from flowers?

- A) Leaves
- B) Seeds
- C) Nectar
- D) Water

2 . What is pollination?

- A) Making honey
- B) Spreading pollen to help plants grow
- C) Flying from flower to flower
- D) Cleaning the hive

3. What is a group of bees called?

- A) A team
- B) A pack
- C) A hive

Name: _____

MINI POSTER!

Activity Two: Create a "Bees Matter" Mini Poster!

 Your poster must include:

1. A catchy title

➤ Examples: "Buzz About Bees!" or "Bees Are Heroes!"

2. facts from the passage

➤ e.g., "Bees collect nectar," "Bees help plants grow," "Bees live in hives."

3. A diagram or drawing

➤ e.g., a flower with a bee pollinating, a beehive, or bees working together.

4. A message to protect bees

➤ e.g., "Plant more flowers!" or "Don't destroy beehives!"
